

Fun Cow Facts

Cows with names produce more milk!

Bulls can't see RED- all cows are red/green color blind, which means that those Spanish Matadors can really use any color flag. The motion of the flag is what gets the bull all fired up.

Cows have a great sense of smell-they can smell things over 6 miles away!

Cows can sleep standing up-however cow tipping is a MYTH! Cows are easily spooked and have excellent hearing, so there is no sneaking up on them.
