Calf Hero™
Software

At Golden Calf Company, we develop our own software, so we are able to immediately respond to your changing needs. The unit is as much a pasteurizer as it is a management tool.

- View the cycle history on the unit or on your cell phone
- Be in the know - aborted cycles, delayed pickups
- switch between English and Spanish (or the language of your choice) with the push of a button
- Efficient energy usage with Hot Water Assist

Calf Hero™ Alert

- Calf Hero™ Alert will send messages to your cell phone or email
- Notifications are for: end of cycle, low supply levels, and errors
- Multiple cell phone numbers and emails
- Three user groups: tech support, accounting, and maternity

Calf Hero™ Viewer

- Calf Hero™ Viewer allows remote access to your Calf Hero™ colostrum units
- Easy access from any internet connected device - no apps required
- Reduce down-time by allowing service technician remote access
- View history of pasteurizing and feeding cycles
- Order colostrum supplies
- Free with every system, customer is responsible for internet setup
HERO
viewer

Touch Screen
- View history
- Order supplies
- Setup reminders
- Multiple languages: English/Spanish/French
