Build the tube feeder you want, all parts sold separately:

- reusable tube feeder
- hose by the inch
- bag connector
- flow clip

Barbed end for hose connection

Perfectly sized, tapered tip for calf safety

Build your own setup

Calf Hero™ Gen X Colostrum Warmers & Pasteurizers

New Generation of Calf Hero™ colostrum warmers and pasteurizers, the “Gen X” is designed to be more affordable than ever before, more compact, and more eco-friendly.

Units are capable of thawing and/or pasteurizing 12, 6, or 3 meals of colostrum.

Designed with common parts to make repairs easy and limit the amount of parts on hand.

With built-in data logging and texting capabilities, oversized parts, and American stainless steel, the Calf Hero™ will serve your dairy for years.

Operation is simple with a touch screen and instructions available in English, Spanish, and French.

NEW Calf Hero™ 12X

DxWxH: 26”x 57”x 33”
Volume: 84 gallons

Elec: single phase 208-240V (48-56 A)
Elec: three phase 208-240V (28-32 A)
Elec: three phase 480V (22 A)

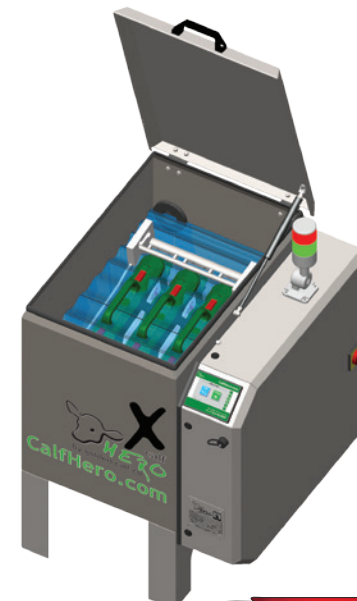

The Backup Power Supply Is Excellent!

“In our area power outages can happen as often as every two weeks, sometimes multiple times a day, depending on the season.”

“The backup power supply is excellent! The machine continues the cycle during a power failure. It saves a ton of time and labor. No one has to go and restart the cycle or check up on the machine when there is a power outage.”

”We do not run the risk of wasting colostrum that would have been left unfinished during an aborted cycle and we do not have to restart, and waste energy or hot water that would normally have been wasted had it stopped and required restarting during a power outage.” - Anton, Halarda Farms, 1200 lactating cow, MB

NEW

NEW Calf Hero™ 3X

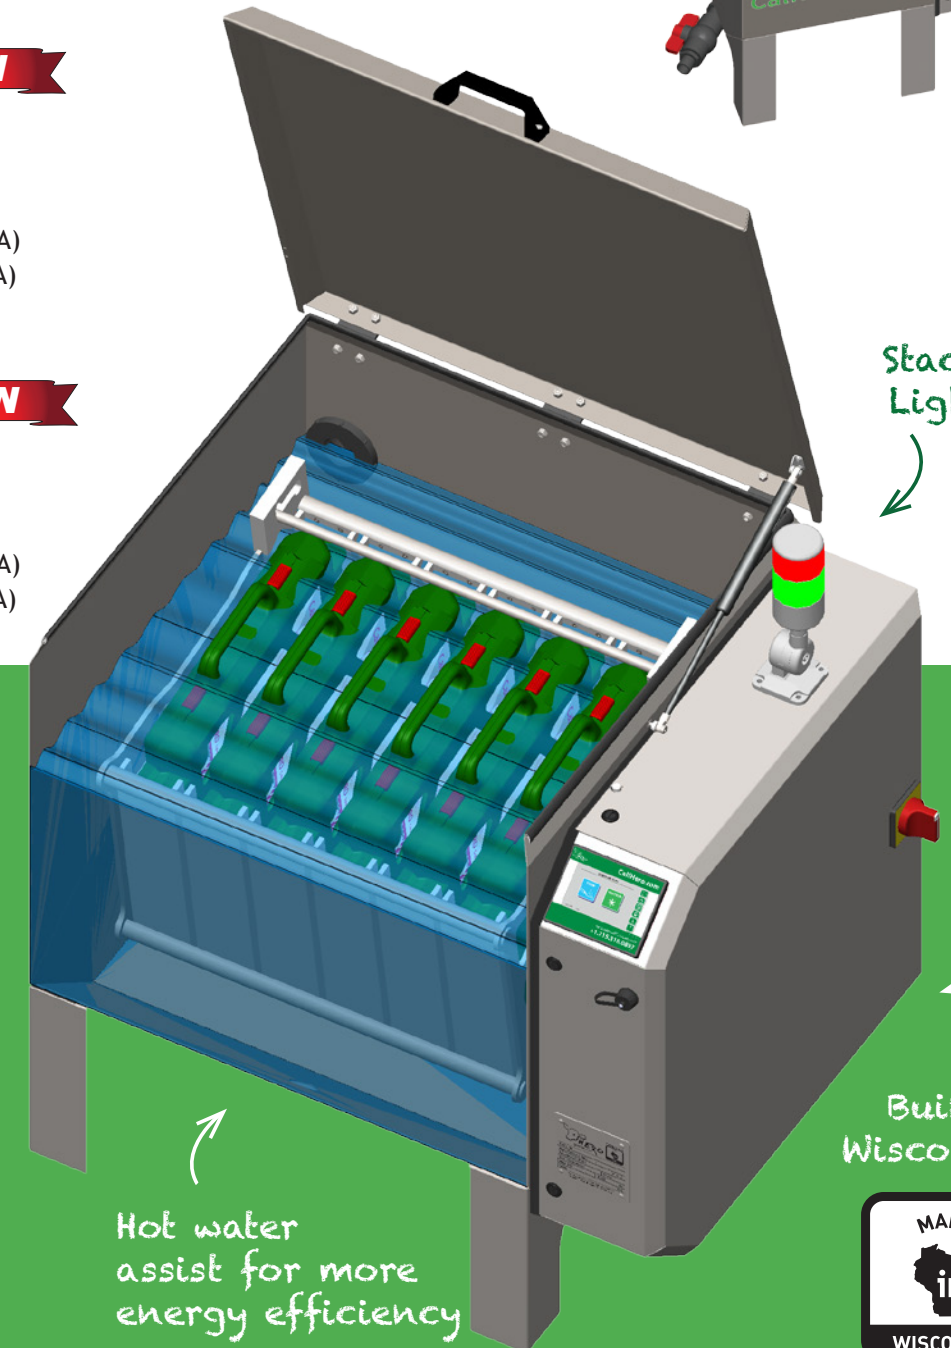

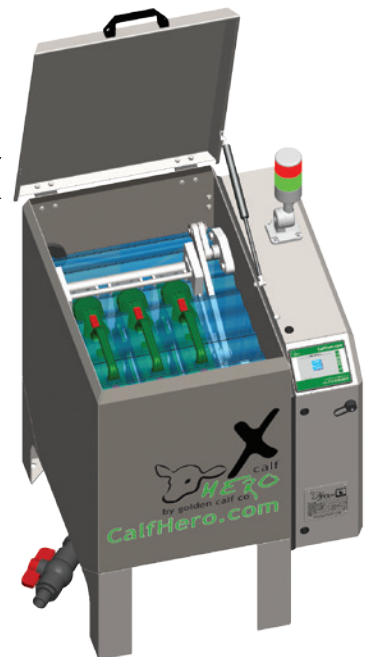

Capacity: 3 meals
DxWxH: 26”x 24”x 33”
Volume: 30 gallons

SMART machine
- Self-diagnosing
- Internet service and repairs

Motion aided heat transfer

Real stainless steel

Hot water assist for more energy efficiency

Built in Wisconsin

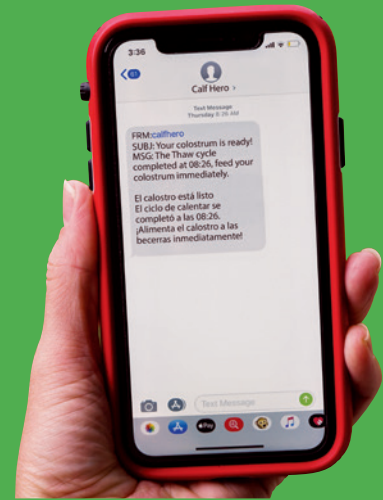

Calf Hero™

Software Advantages

At Golden Calf Company, we develop our own software, so we are able to immediately respond to your changing needs. The unit is as much a pasteurizer as it is a management tool.

- View the cycle history on the unit or on your cell phone
- Be in the know - aborted cycles, delayed pickups
- Switch between English and Spanish (or the language of your choice) with the push of a button
- Efficient energy usage with Hot Water Assist

Calf Hero™ Alert

- Calf Hero™ Alert will send messages to your cell phone or email
- Notifications are for: end of cycle, low supply levels, and errors
- Sends messages to multiple cell phone numbers and emails
- Three user groups: tech support, accounting, and maternity

Calf Hero™ Viewer

- Calf Hero™ Viewer allows remote access to your Calf Hero™ colostrum units
- Easy access from any internet connected device - no apps required
- Reduce down-time by allowing service technician remote access
- View history of pasteurizing and feeding cycles
- Order colostrum supplies
- Free with every system, customer is responsible for internet setup

“Decrease in premature culling rate”

“We wanted to give better quality colostrum to our heifers because we had very uneven results in passive transfer. Calf Hero™ allowed us to easily standardize the colostrum administration procedure. Now we have a colostrum of excellent quality available for our heifers within 30 minutes. Our results today are very good: a passive transfer success rate of 90% and a reduction in the premature culling rate thanks to better weight gain and better health. Its use is very simple, we have 12 people who use it all very easily and without error.”

Testimony of Dominic Drapeau, Drapeau & Bélanger Farm, 775 cows in Ste-Françoise de Lotbinière, QC
